

# MEP Engineers and Contractors

# ABOUT US

At Sankhla Enterprises, we are renowned for delivering exemplary end-to-end solutions in the realm of MEP, electrical, and utility projects. Our track record is impeccable; our clientele can attest to that. We have a team comprised of highly proficient engineers and technicians who work diligently towards meeting customer requirements with unparalleled quality service at all times.

Moreover, by using innovative technology & techniques coupled with strategic planning capabilities we guarantee custom-tailored services unique to each individual's needs while forging strong relationships built on trustworthiness and commitment over time due to excellence upheld throughout every given project phase execution!

# OUR MISSION AND VISION

## MISSION

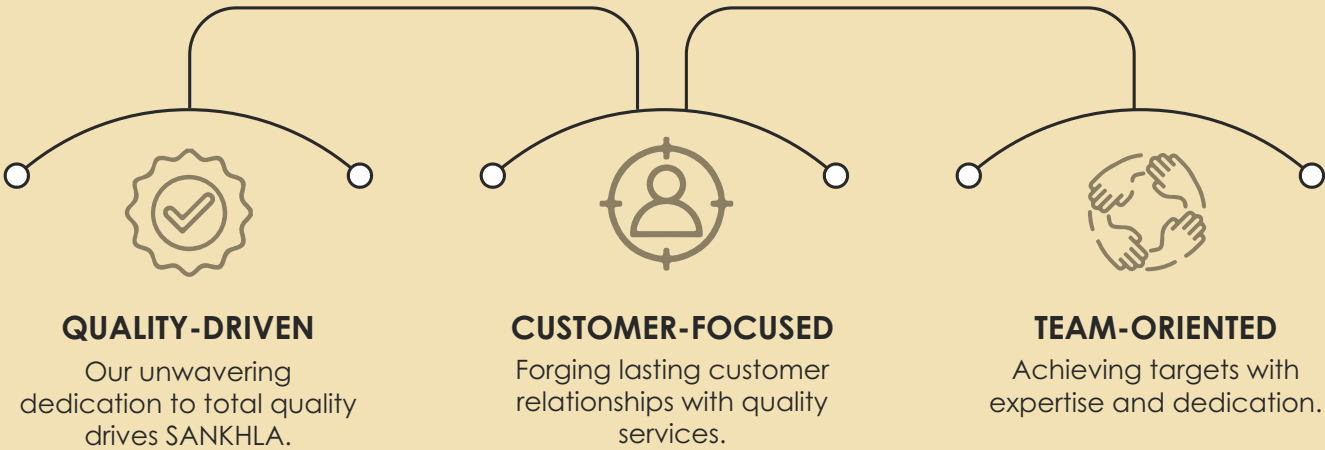

At Sankhla Enterprises, our commitment to excellence is evident in all aspects of MEP, electrical, and utility project solutions. We pride ourselves on utilizing technology innovation as we strive towards delivering unprecedented quality services. Above all else, it's important to us that we create value for our clients and stakeholders by consistently fulfilling promises - earning their trust so they rely on us every time!

## VISION

As a pioneering force in our industry, we have dedicated ourselves to the mission of making life-changing advancements. Our ambition is to build upon this legacy for generations; one that serves us as the catalyst for change with each step forward.

# HOW WE'RE CHANGING THE GAME?

# OUR VALUES

SANKHLA, reflects the values that we hold dear:

## SUPERVISION

We take great pride in our commitment to superior project supervision. Our knowledgeable team of supervisors works tirelessly to provide the highest levels of communication and quality control throughout each stage, keeping clients informed at all times for complete confidence and satisfaction.

## ACCEPTABILITY

Our focus is on providing solutions that are individually tailored to our client's needs, ensuring both sustainability and practicality. We work diligently with each customer in order to provide the best possible outcome - one which meets every requirement for their project.

## NOVELTY

We are committed to taking the lead in introducing new ideas and cutting-edge technologies, never content with traditional methods or solutions. Our dedication to being at the forefront has enabled us to stay competitive while optimizing our processes for maximum efficiency and effectiveness.

## KNOWLEDGE

Our team of professionals is always looking to stay ahead when it comes to providing top-notch solutions. With regular training and development programs, we ensure that our experts are well-versed in the latest industry trends - giving them a competitive edge.

## HONESTY

We seek to foster robust client relationships based on trust, respect, and the highest standards of integrity. By upholding our commitment to transparency in all interactions with clients, we strive for a productive partnership that stands the test of time.

## LEADERSHIP

Our team is committed to delivering superior results and exceeding expectations on every project. With comprehensive solutions encompassing planning, execution, and beyond - we're ready to take charge of the full scope.

## AGILITY

Our team is adept at rising to the challenge of projects that require quick pivots. We recognize how vital it is for clients to have reliable solutions no matter what turns their project takes, and are dedicated to crafting flexible answers tailored precisely to those needs.

## ATTITUDE

Our team has a "can-do" attitude that drives us to provide exceptional services and exceed client expectations. We embody dedication and positivity in all of our endeavors to ensure maximum satisfaction for our customers.

## APTITUDE

Our exceptional squad of experts is second to none, with decades of successful project completion under their belts. We guarantee results that go beyond the expected - on time, every time!

# AN OVERVIEW OF MEP SERVICES

## MEP Engineering: The Key to Optimized Industrial Systems

In the realm of industry, MEP refers to Mechanical, Electrical, and Plumbing. MEP engineering is the mastery of planning, designing, and administering these essential systems to ensure optimal functionality.

### MECHANICAL

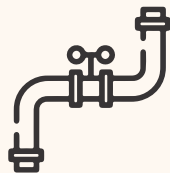

The functional components driving key industries, such as HVAC, Fabrication, ETP/STP, RO, FIRE HYDRANT SYSTEM, FIRE SPRINKLER SYSTEM, PUMP HOUSE, provide optimal comfort levels within business establishments while maintaining full compliance with government regulations. These critical systems ensure our ability to occupy buildings safely and effectively.

### ELECTRICAL

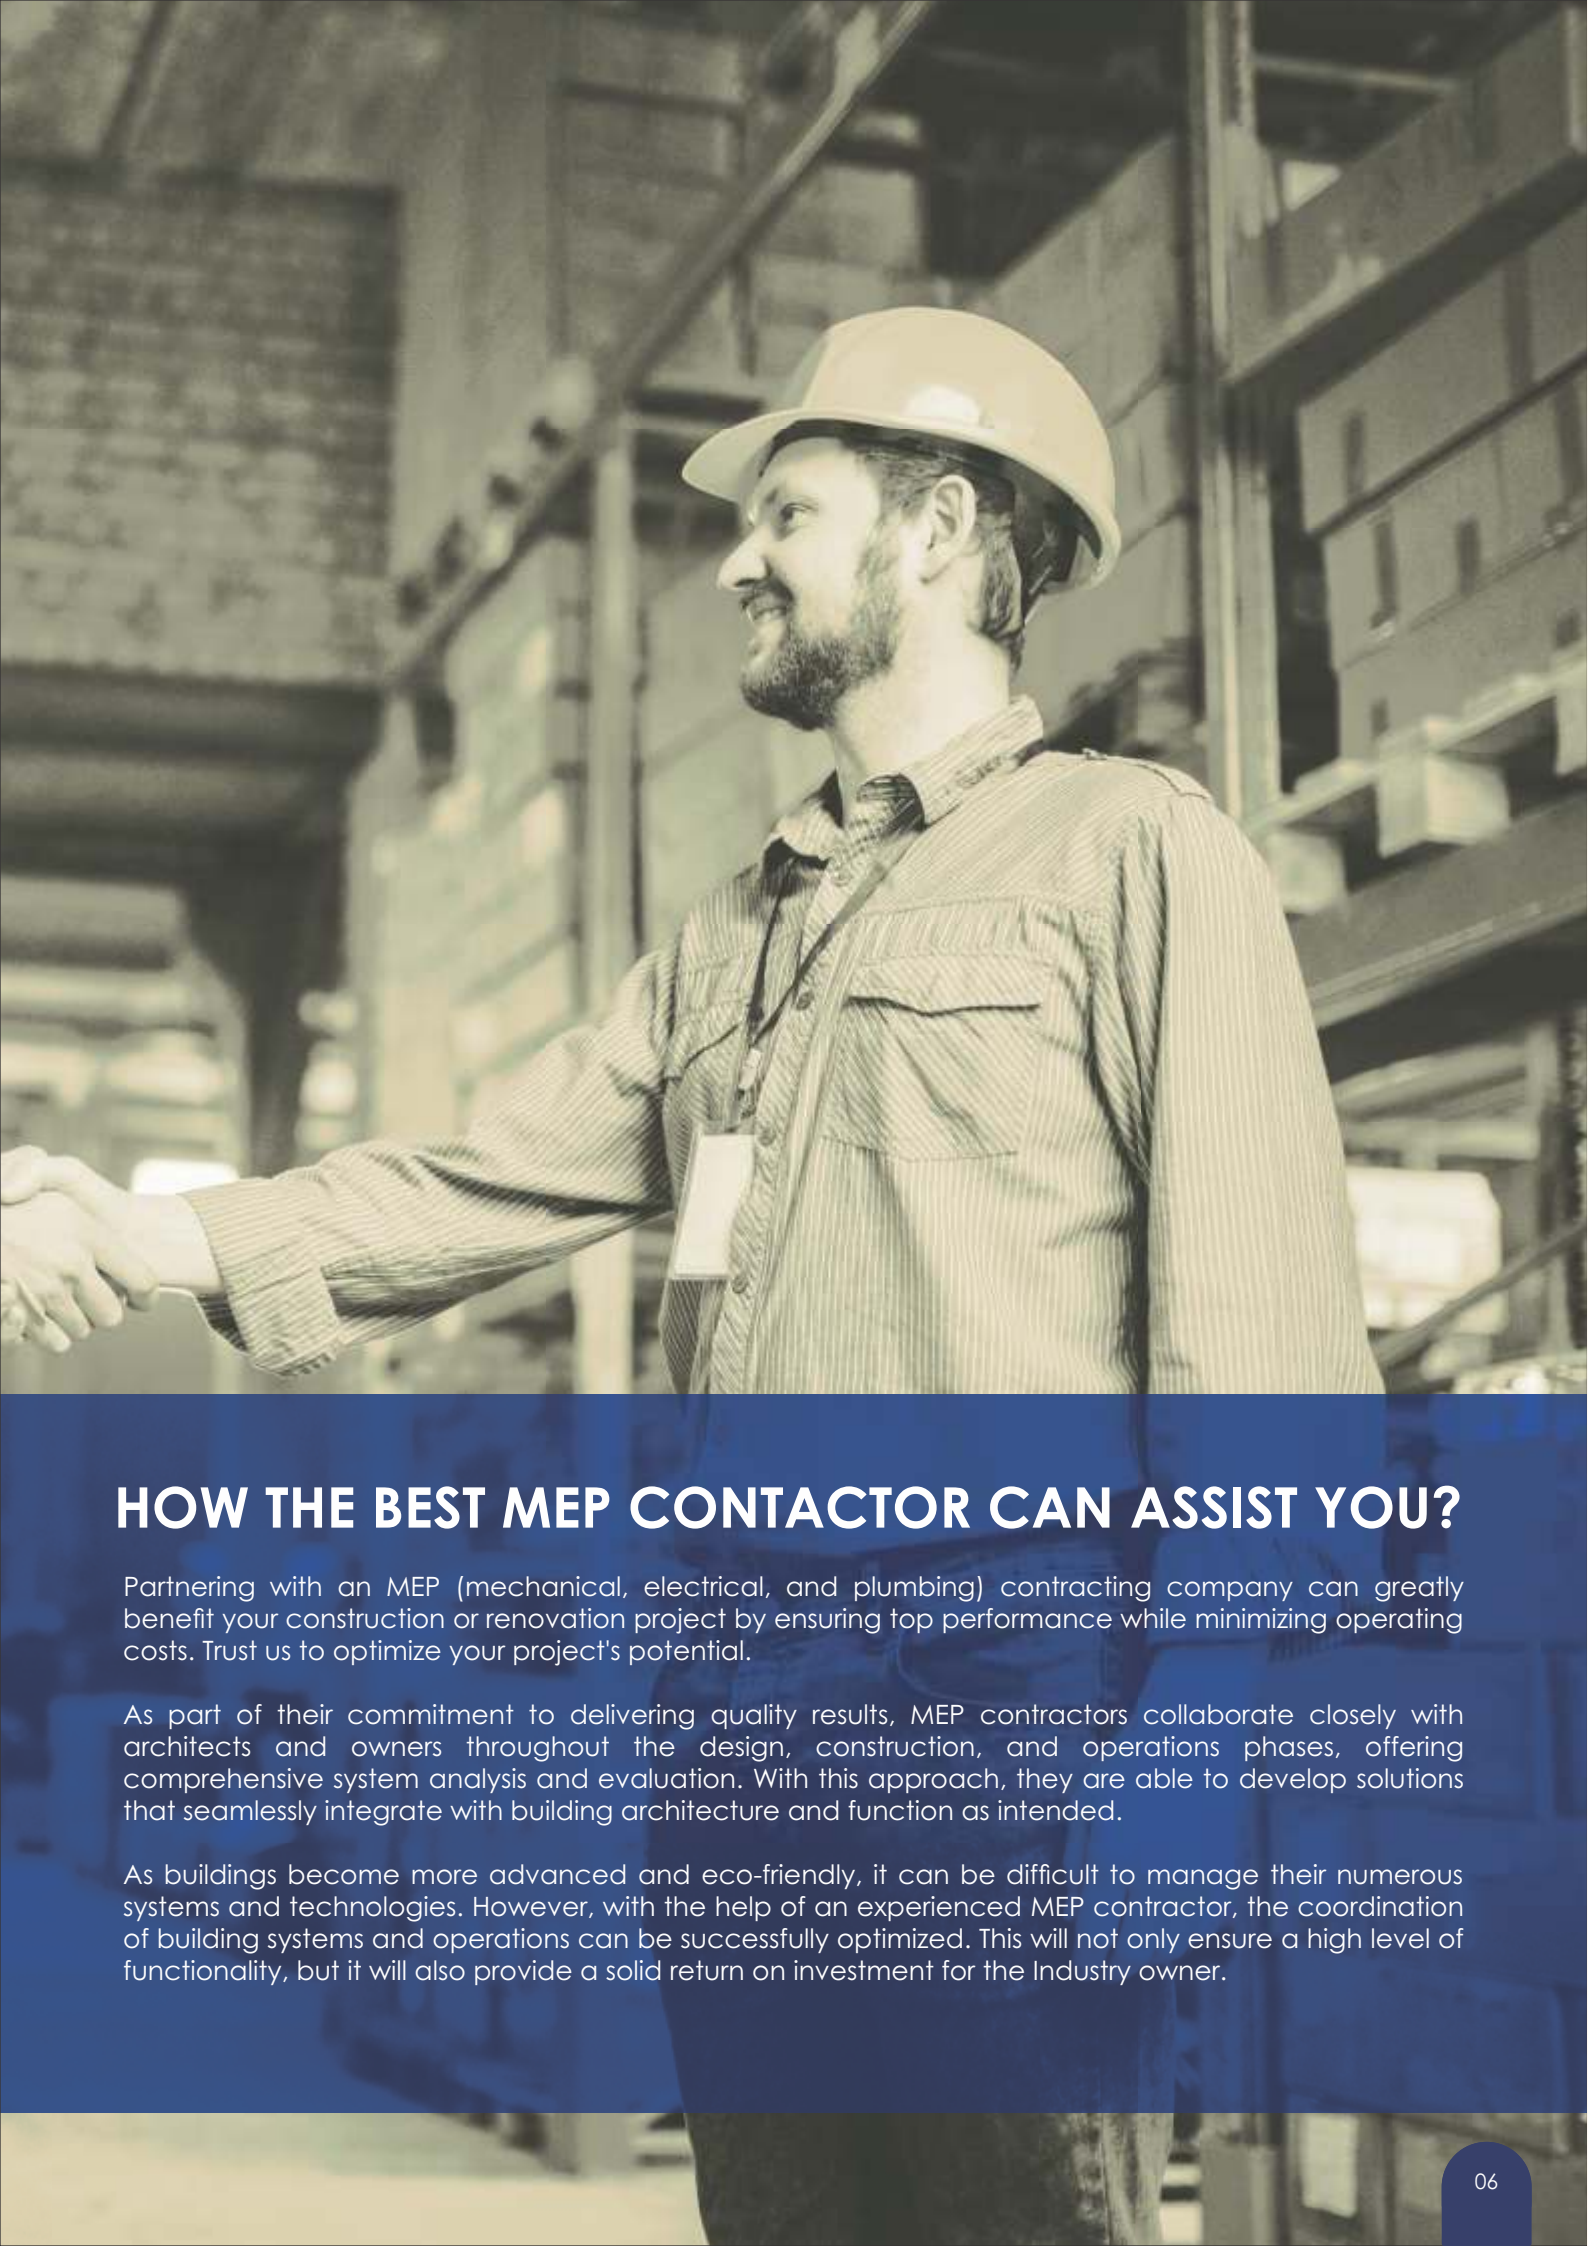

The electrical system within an industry plays a critical role in powering machinery and keeping all other systems operational. It includes high voltage architecture systems for lighting and cabling, as well as low voltage systems for data, telephone, fire alarms, and more. Properly designed and planned electrical systems, including HT/LT panels, earthing and lightning arresters, are essential for effective electrical engineering.

### PLUMBING

Plumbing is essential for human sustenance. Without it, how would we access clean drinking water or dispose of waste safely? Plumbing systems provide fresh water for drinking, drainage systems, and various fluid lines, including steam and condensate lines. They also play a crucial role in cleansing and removing storm and sanitary wastewater.

## HOW THE BEST MEP CONTRACTOR CAN ASSIST YOU?

Partnering with an MEP (mechanical, electrical, and plumbing) contracting company can greatly benefit your construction or renovation project by ensuring top performance while minimizing operating costs. Trust us to optimize your project's potential.

As part of their commitment to delivering quality results, MEP contractors collaborate closely with architects and owners throughout the design, construction, and operations phases, offering comprehensive system analysis and evaluation. With this approach, they are able to develop solutions that seamlessly integrate with building architecture and function as intended.

As buildings become more advanced and eco-friendly, it can be difficult to manage their numerous systems and technologies. However, with the help of an experienced MEP contractor, the coordination of building systems and operations can be successfully optimized. This will not only ensure a high level of functionality, but it will also provide a solid return on investment for the Industry owner.

## AREAS WHERE WE MAKE AN IMPACT

### HEATING, VENTILATION, AND AIR CONDITIONING (HVAC)

An MEP contractor can optimize your heating and cooling system with under-floor air distribution (UFAD) and energy-conserving automation techniques. From installation to operation, your system will be engineered to run efficiently, deliver superior occupant comfort, and uphold eco-friendly standards. Let us help you achieve optimal results.

### ELECTRICAL AND LIGHTING SYSTEM

As an MEP Contractor, we understand the importance of undertaking projects systematically while maintaining close coordination with PMC/Architect and the owner. This approach ensures timely execution with top-quality workmanship – crucial factors in any successful project. Moreover, we also offer valuable suggestions for energy-efficient and cost-effective installation of electrical and light fixtures. In doing so, our MEP engineers not only reduce electricity consumption but also provide guidance based on previous successful installations. Trust us to deliver results that go beyond your expectations.

### PLUMBING

Our plumbing work covers everything from fire suppression and storm water to natural gas, drinking water, irrigation water, and other waste water systems. With the help of skilled MEP engineers, we can guarantee that your plumbing design and equipment are operating at the highest level of efficiency possible. Plus, we can integrate water conservation techniques and other design strategies to make your building eco-friendly and cost-effective. Trust us to take care of all your plumbing needs.

### ENERGY CONSERVATION

As an MEP contractor, we understand that efficient energy usage is crucial. That's why we specialize in seamlessly integrating HVAC, electrical, and utility piping elements to achieve maximum energy-saving results. Our coordinated approach ensures that you get the most effective utility sections possible. Trust us to help you reach your energy goals.

### FIRE ALARMS AND PROTECTION

Coordinating sprinkler and fire suppression systems requires careful planning and execution. Compliance with NBCC codes is just the beginning - each area of your building has unique needs that must also be considered. With the help of an MEP contractor, fire alarms and plumbing systems can be seamlessly integrated to ensure optimal functionality.

### BUILDING MANAGEMENT SYSTEM (BMS)

Centralized networks of hardware and software, known as Building Management Systems, can effectively control various mechanical, electrical and plumbing features of a building, including the HVAC system, lighting, security and fire alarms. These automation systems are crucial to ensuring optimal operational performance levels and the safety and comfort of all within the building.

## OUR SERVICES

We specialize in providing MEP engineering and contracting services.

### ELECTRICAL

- ▶ Power distribution systems
- ▶ Lighting control
- ▶ Power generation
- ▶ LT/HT systems
- ▶ Telephone & data systems
- ▶ CCTV
- ▶ Fire detection & alarms
- ▶ Building management system
- ▶ Access control systems
- ▶ Audio/video intercom systems
- ▶ Industrial process services
- ▶ P.A. sound systems
- ▶ Building lighting systems

### PLUMBING

- ▶ Hot & cold water supply system
- ▶ Water filtration system
- ▶ Sewage treatment
- ▶ Steam/fluid/air-line
- ▶ Cooling tower

## FIRE FIGHTING SYSTEMS

- ▶ Fire fighting - sprinkler system
- ▶ Fire suppression system

## HVAC AND DUCTING SYSTEMS

- ▶ G.I ducting system
- ▶ Chilled water piping system
- ▶ Package units, DX units, and Fan coil units
- ▶ Ventilation systems
- ▶ Ecology units
- ▶ Kitchen hood exhaust and Fresh air system
- ▶ Air balancing system and Certifications

## TYPE OF INDUSTRY COVERED

- ▶ Power Supply
- ▶ High Voltage Switch Yard (11KV to 33KV)
- ▶ Food Industries
- ▶ Industrial Projects
- ▶ Textile Industries
- ▶ Chemical Industries
- ▶ Automobile Industries
- ▶ Plastic Industries
- ▶ Electronics Industries
- ▶ Pharmaceutical Industries
- ▶ Automotive Glass
- ▶ Textiles & Fabrics
- ▶ Induction Moulding & Packaging
- ▶ Casting /forging industry
- ▶ Medical product
- ▶ FMEG (fast moving Electrical Goods) industry
- ▶ Guar gam industry
- ▶ Govt Institutions/university
- ▶ MRO
- ▶ Industrial gas industry
- ▶ Pesticides industry
- ▶ FMCG industry
- ▶ Tyre industry
- ▶ Beverage industry

& Many More..

Comprehensive end-to-end solutions: At Sankhla Enterprises, we provide comprehensive solutions for MEP, electrical, and utility projects from design to implementation and ongoing maintenance.

Commitment to safety, sustainability, and quality: Our team goes the extra mile to ensure that every project meets prevailing safety protocols and environmental standards, so clients can enjoy total peace of mind. We build with durability and sustainability in focus, ensuring projects last for years to come.

Highly skilled and experienced team: Our team is always well-versed in the latest industry trends and standards, as we prioritize their professional growth through training and development.

Customized solutions for unique needs: Our clients' individual projects are our top priority; we customize solutions to exceed their expectations. We're passionate about delivering quality results and first-rate client satisfaction.

Cutting-edge technology and innovation: Our team has the expertise to deliver cutting-edge solutions by harnessing digital tools and sophisticated technologies. This allows us to provide top-notch service quickly and effectively.

**ON-TIME AND ON-BUDGET DELIVERY:** Ensuring timely and budget-friendly project completion is a cornerstone of our commitment to delivering quality service.

**STRONG PARTNERSHIPS AND COLLABORATIONS:** Our collaborative process combines effective communication and cooperation between stakeholders, making sure no detail is missed. Working together from start to finish we guarantee a smooth project experience for everyone involved!

**EXCEPTIONAL CUSTOMER SERVICE:** Our company is dedicated to delivering outstanding results and providing exemplary customer service. We eagerly attend to inquiries with utmost efficiency and care.

**LOCAL EXPERTISE WITH A GLOBAL PERSPECTIVE:** Our team delivers a unique and comprehensive approach to each project, blending international insight with local proficiency.

**PROVEN TRACK RECORD OF SUCCESS:** Our exceptional track record of delivering extraordinary projects to our loyal clients ensures that anyone who entrusts us with their project can count on unsurpassed excellence and satisfaction.

# WHY CHOOSE US?

## ● WE ARE PROFESSIONAL

At our company, we are passionate about professionalism and strive to create an environment where trust is established through transparent corporate practices. By treating all stakeholders with respect, fairness, and honesty - clients, co-workers, and suppliers - meaningful relationships form the foundation of sustainable success within our organization.

As conscientious stewards of both safety in the workplace as well as preserving natural resources for generations yet to come; we remain deeply dedicated at every level while maintaining high standards rooted in integrity and excellence that constantly exceed expectations.

## ● WE ARE TRUSTED

Our company strives to build strong, long-lasting partnerships that benefit all stakeholders. We recognize these relationships as essential for unlocking growth and maximizing value in the long run. To ensure this is achieved, we prioritize understanding our client's needs, challenges, and opportunities; going above and beyond to provide them with tailored support throughout their journey.

By doing so we have helped companies get off-ground level up - always dedicating ourselves towards delivering exceptional service outcomes at every turn of their way!

Looking forward to helping more customers reach successes of profitability through powerful alliances across the entire value chain: reducing system costs whilst improving overall service levels & expanding our reach even further.

## ● COMPREHENSIVE INFRASTRUCTURE SUPPORT

Our company strives to build strong, long-lasting partnerships that benefit all stakeholders. We recognize these relationships as essential for unlocking growth and maximizing value in the long run. To ensure this is achieved, we prioritize understanding our client's needs, challenges, and opportunities; going above and beyond to provide them with tailored support throughout their journey.

By doing so we have helped companies get off-ground level up - always dedicating ourselves towards delivering exceptional service outcomes at every turn of their way!

Looking forward to helping more customers reach successes of profitability through powerful alliances across the entire value chain: reducing system costs whilst improving overall service levels & expanding our reach even further.

## ● PEOPLE POWER

At Sankhla, we recognize the immeasurable value of our people. The dedication and craftsmanship of our unparalleled team are reflected in everything they do - no matter how big or small the project.

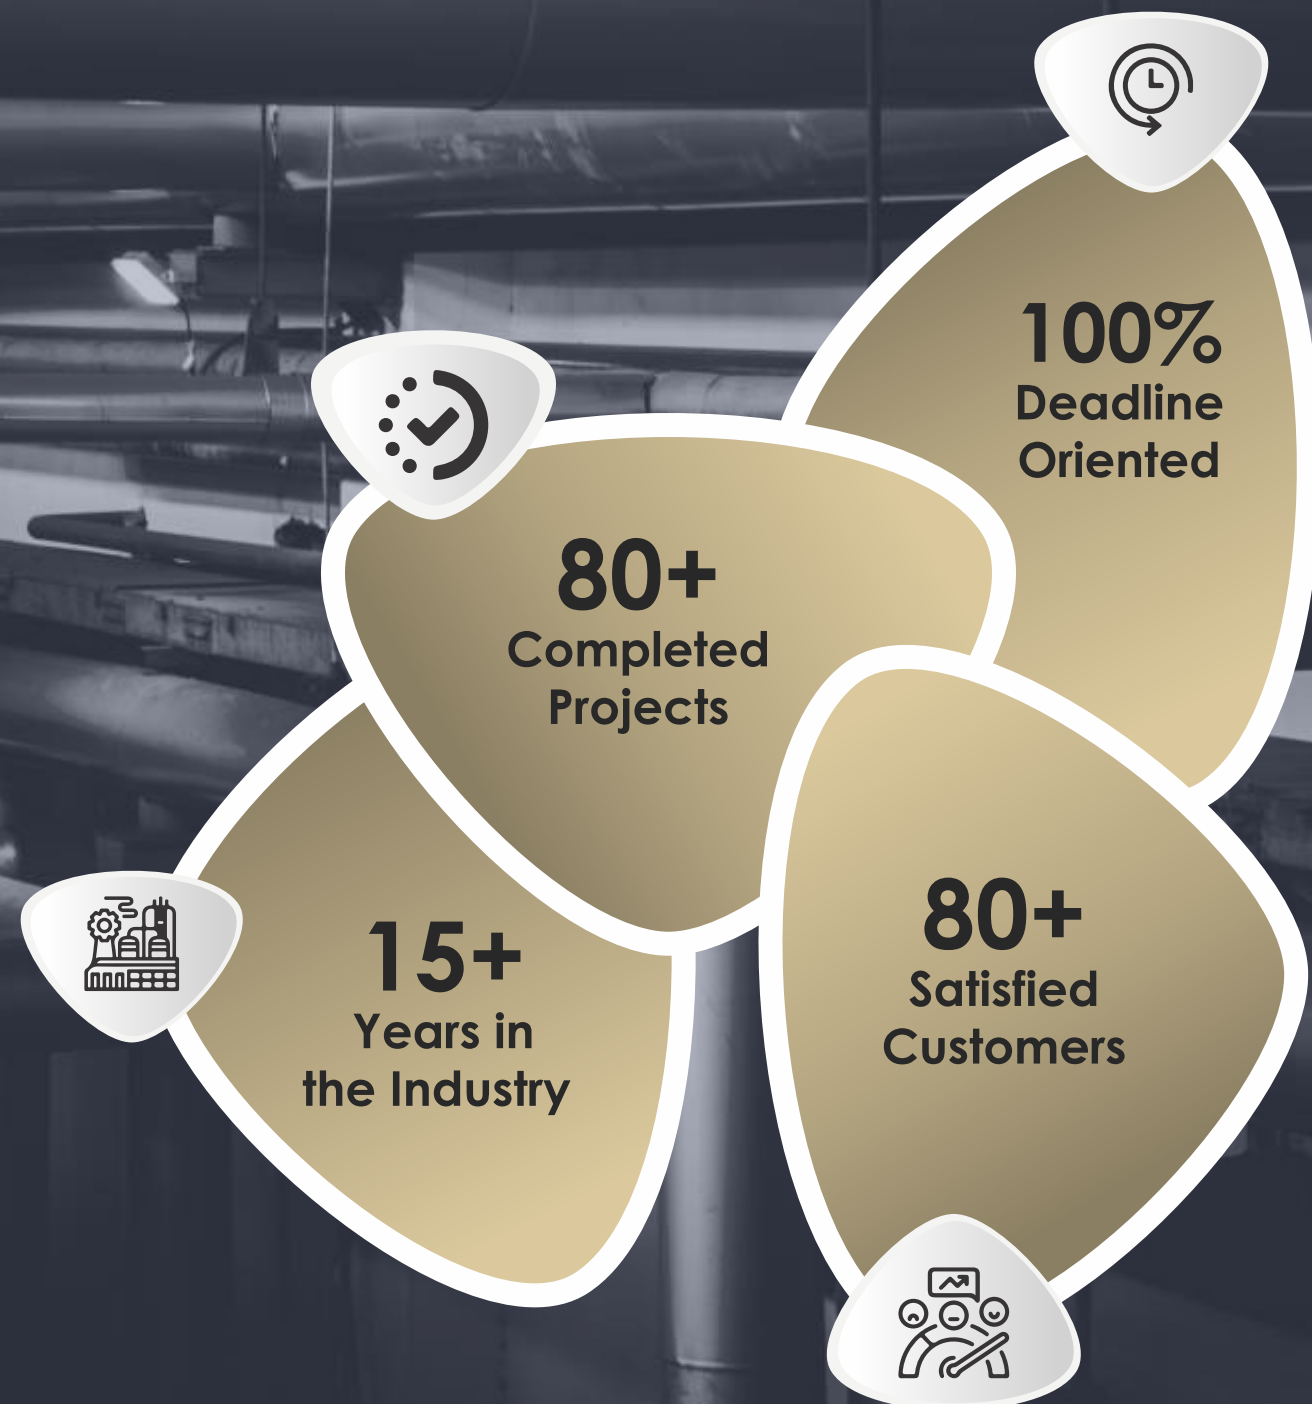

Our 80+ senior managers, engineers, supervisors, and technicians possess the eminent experience necessary to realize outstanding results at every level while staying nimble enough to meet each customer's individual requirements swiftly and competently .

Cheered on by a technophile management group that has gathered heaps of knowledge over decades in this industry – it's easy for us to keep in step with today's quickly evolving business climate!

## OUR SUCCESS SPEAKS THROUGH NUMBERS

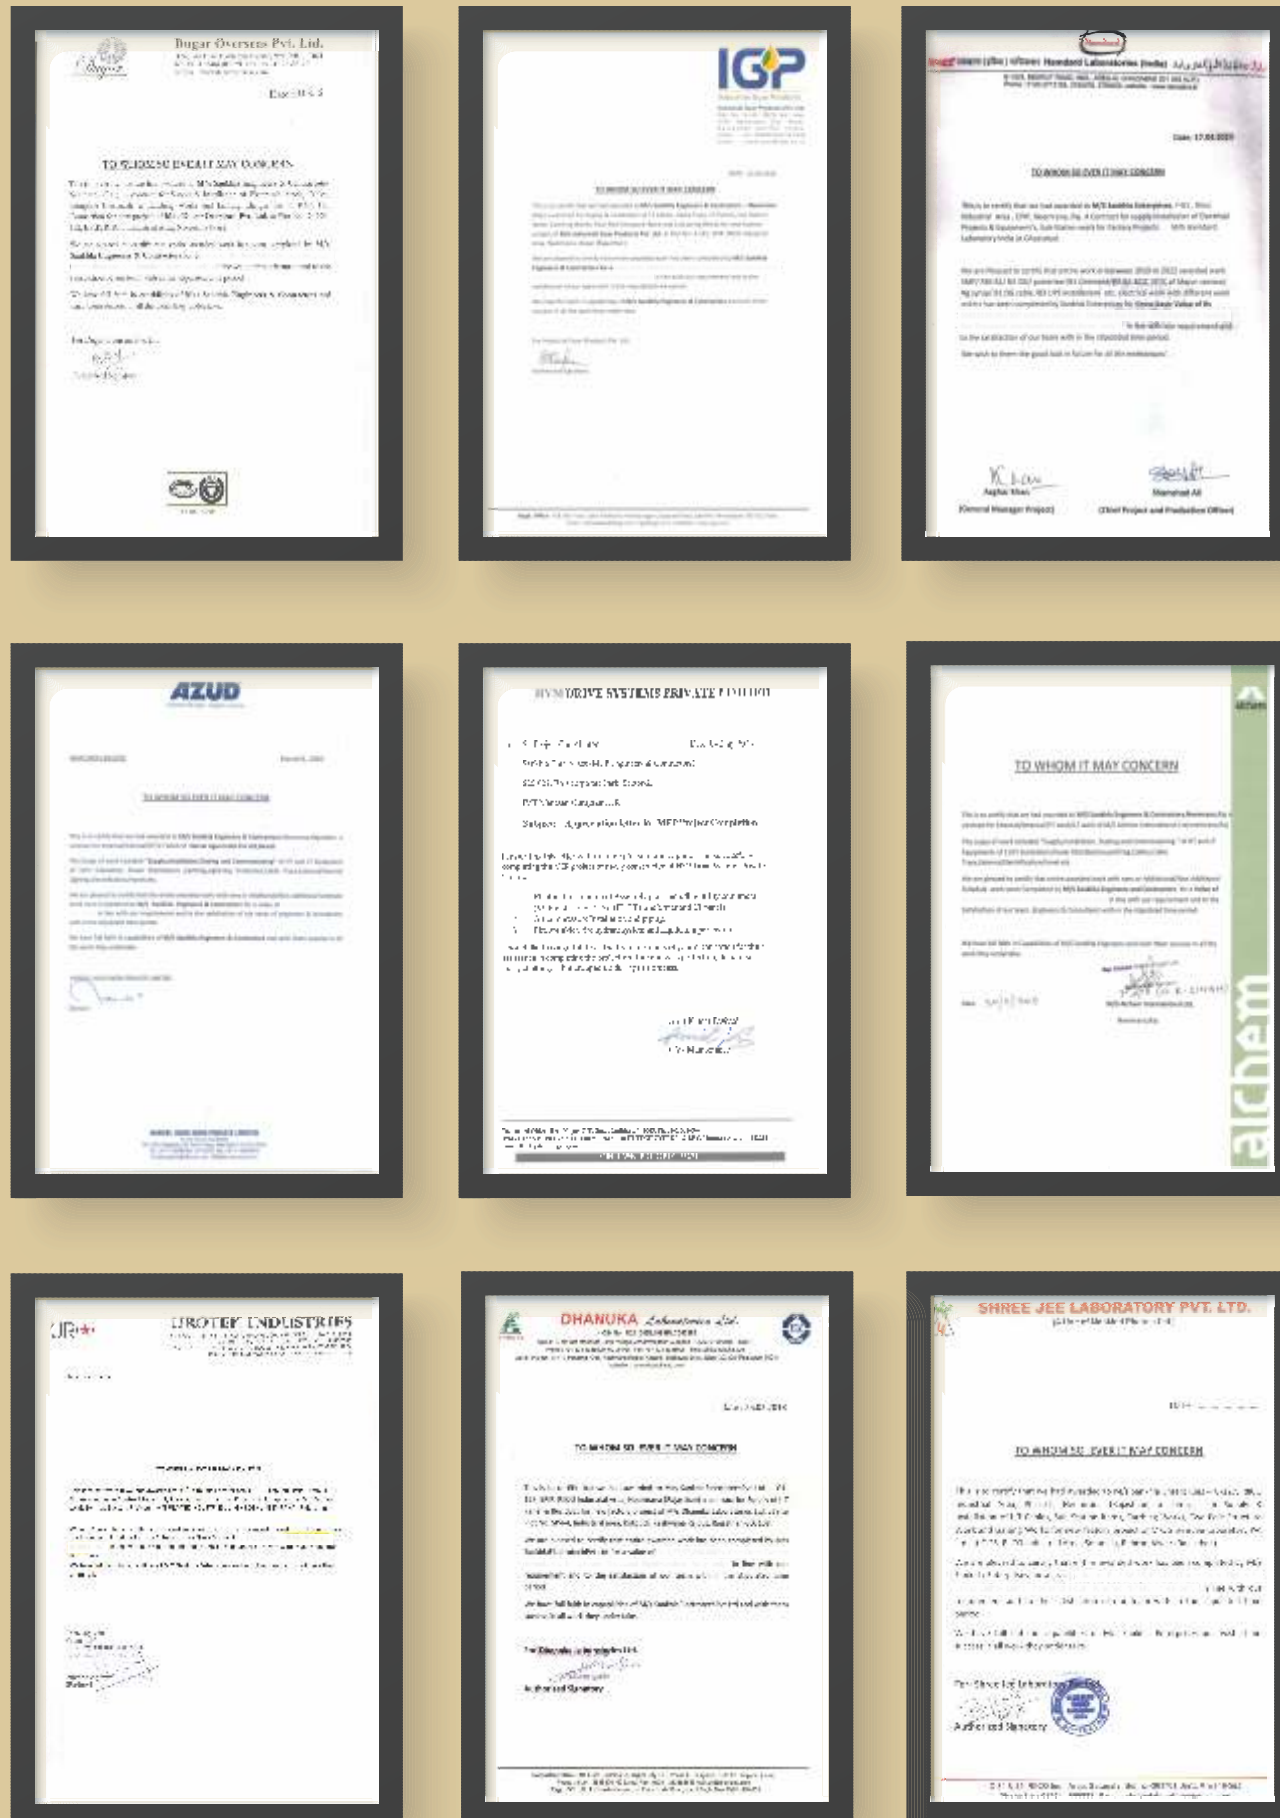

## OUR AREAS OF ACTIVITY

- ▶ Activity of Fabrication ie. HVAC Duct, Steel Fabrication, DG stack, Diesel Tank, Steel Structure, Fire Fighting, DH Exhaust Structure Fabrication, Pipe Lines
- ▶ All kinds of HVAC Projects, Fresh Air Ventilation, Air washers, Ducting, etc.
- ▶ HT,MV,LT Electrical, Low voltage installations from concept to commissioning
- ▶ Obtaining power sanction and sanction for servicing power to any building after obtaining approval from the local electrical authority
- ▶ Planning and installation of complete building management systems
- ▶ Annual maintenance contracts for medium to large HVAC/electrical equipment and installation
